QTP/UFT INTERVIEW QUESTIONS

1) What is the automation framework you are using for your application

2) What is the use of framework

3) Did you involve in framework development

4) Explain your framework

5) How do you manage and send test data to application in your framework

6) How do you manage and load your function libraries

7) How do you handle runtime error in your script

8) How do you implement synchronization in your framework

9) Did you use regular expression in your project, please explain the scenario

10) How do you use descriptive programming

11) How do you manage shared object repository

12) How do you execute your automation scripts

13) How do you manage your test results

14) How do you debug script if it is failed

15) How do you handle duplicate objects on a page

16) How do you handle dynamic objects

17) Have you involved in automation POC

18) What are the challenges you faced in while automating your application

19) Lessons learnt in automation testing

20) What do you do you do if object not identified by QTP

21) What do you do you when changes happened in application existing functionality

22) Ways of getting data from Excel files

23) Write a code for any simple scenario using your framework

24) What is the difference between Associate Library File in settings, ExecuteFile and LoadFunctionLibraries in QTP

25) How do you verify text displayed on page

26) How do you get output data from application

27) Difference between ChildObjects and ChildItem

28) Explain WebTable methods

29) Difference between OR and Descriptive programming

30) How do you close all opened browsers

Additional Questions for Seniors/Leads

31) How do you start automation for any application

32) How do you choose automation tool for your application

33) How do you choose test cases for automation

34) How do you prepare automation Estimations

35) How do you choose framework for your application

36) Did you do POC

37) What is automation test strategy

38) What do you do if a team member is on PTO but you have urgent deliverables

39) Your client is asking you to reduce the regression window, what do you do

40) What is the automation coverage for your application

VBScript Advanced Questions

1) Write a program to read data from a text file

2) Write a program to write data into a text file

3) Write a program to print all lines that contains a word either "testing" or "qtp"

4) Write a program to display all files containing "demo" in their name

5) Write a program to print all lines in a file that ends with "world"

6) Write a program to check whether string starts with "Error"

7) Write a program to Replace all words that contains "demo" in a file with the word "QTP"

8) Write a program to check whether a string contains only alpha numeric's

9) Write a program to check whether given string is in date format

10) Write a program to print all the lines ending with '$'

11) Check whether middle three characters in a word contains alphanumeric

12) Write a program to print the current folder name

13) Write a program to print files in a given folder

14) Write a program to print subfolders in a given folder

15) Write a program to display files of a specific type

16) Write a program to Retrieve all the rows in a table

17) Write a program to find the name of columns in a table

18) Write a program to find number of rows in each column

19) Write a program to connect and print data from SQL Server database

20) Write a program to retrieve specific field from the database table

21) Write a program to open the two record sets

22) Write a program to update the specific field in the database table

23) Write a program to find number of rows in a table

24) Write a program to send an email using outlook

25) Write a program to print data present in all sheets of an excel files
